To: The Commission

FCC MAIL BRANCH

PETITION AGAINST RULE MAKING

I, Doris B. Crady, N6VFX, hereby submit my request to the Federal Communications Commission to NOT take action of the petition for Rule Making as submitted by the American Radio Relay League.

I have been a very active Amateur Ham radio operator for about 3 years and am a Technician Class Licensed Operator. I was introduced to the 1.25 Meter Band and am very active on this band ever since I became a licensed operator by the F.C.C.

I have experienced many incidents and have participated in many such Earthquake Preparedness, Health and Welfare. We all know what Communications meant during the recent San Francisco Earthquake and since we live in an Earthquake prone area it is imperative that we are able to use this repeater for local communications and Health and Welfare. I have also experienced many accidents on our crowded Freeways and made many calls to the California Highway Patrol and other agencies for help for accident victims and potential victims due to conditions of the road (i.e. debris and other obstructions).

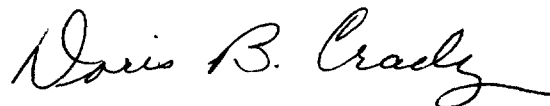

The 222 Meter repeater stations that are widely used here in Southern California would be detrimentally affected if any more of this frequency is taken away. The ability to use this 1.25 Meter band which can reach out to the greater part of So. California from local Repeaters to San Francisco, Reno North, and San Diego to the South, Las Vegas to the East. Please consider our needs here in this area as it is so vital to us.

I really enjoy this 1.25 Meter band for communications with my family and friends, while I am travelling in the community, for safety and welfare purposes and also enjoyment as a hobby. I also have invested many dollars in equipment to use in this 1.25 Meter band that would result in a loss personally to me.

For my reasons mentioned above, this writer respectfully asks this Commission to abandon the proposed allocation of 222.000 to 222.150, to weak signal use, and instead defer this matter back to the ARRL for resolution with local area coordination councils.

Respectfully submitted,

December 16, 1991
